

EXPT 10 : Java Program on “ loop” and “array”

//Java Program to Input 5 Marks, Print Marks, Print Total Marks and Percentage using loop and array

```
class Marksheet {  
    public static void main(String[] args) {  
  
        int marks[] = {85, 78, 92, 74, 88};  
  
        int total = 0;  
        double percentage;  
  
        System.out.println("----- MARKSHEET -----\\n");  
  
        for(int i = 0; i < marks.length; i++) {  
            System.out.println("Subject " + (i+1) + " Marks: " + marks[i]);  
            total = total + marks[i];  
        }  
  
        percentage = total / 5.0;  
  
        System.out.println("\\n-----");  
        System.out.println("Total Marks: " + total);  
        System.out.println("Percentage: " + percentage + "%");  
        System.out.println("-----");  
    }  
}
```

EXPT 11: Java Program on “ Anonymous Array”

//Java Program on Anonymous Array in Java using (new operator)

```
public class AnonymousArray{  
    //creating a method which receives an array as a parameter  
    static void printArray(int arr[])  
    {  
  
        for (int i=0; i<arr.length;i++){  
            System.out.println(arr[i]);  
        }  
  
    }  
    public static void main(String args[]) {  
  
        printArray(new int [] {10,22,44,66}); //passing anonymous array to method  
    }  
  
}
```

EXPT 12 : Java Program on “array (matrix transpose)”

//Java Program to calculate transpose of matrix

```
class TransposeMatrix {  
    public static void main(String[] args) {  
  
        int matrix[][] = { {1, 2, 3}, {4, 5, 6} };  
  
        int rows = 2, cols = 3;  
  
        System.out.println("----- ORIGINAL MATRIX -----\\n");  
  
        for(int i = 0; i < rows; i++) {  
            for(int j = 0; j < cols; j++) {  
                System.out.print(matrix[i][j] + " ");  
            }  
            System.out.println();  
        }  
  
        System.out.println("\\n----- TRANSPOSE MATRIX -----\\n")  
        for(int i = 0; i < cols; i++) {  
            for(int j = 0; j < rows; j++) {  
                System.out.print(matrix[j][i] + " ");  
            }  
            System.out.println();  
        }  
    }  
}
```

EXPT 13: Java Program on “ Java Interface”

//Java Program on Java Interface which provides the implementation of Bank interface

```
interface Bank{

    float rateOfInterest();

}

class SBI implements Bank{

    public float rateOfInterest() {

        return 9.15f;

    }

}

class PNB implements Bank{

    public float rateOfInterest(){

        return 9.7f;

    }

}

class TestInterface2{

    public static void main(String[] args) {

        Bank b = new SBI();

        System.out.println("ROI: " + b.rateOfInterest());

    }

}
```

EXPT 14: Java Program on “File Handling (byte into file)”

//Java Program to write a byte into a file

```
import java.io.FileOutputStream;

public class FileOutputStreamByteIntoFile {

    public static void main(String args[]){

        try{

            FileOutputStream fout=new FileOutputStream("D:\\testout.txt");

            fout.write(65);

            fout.close();

            System.out.println("success...");

        }catch(Exception e){System.out.println(e);}

    }

}
```

EXPT 15 : Java Program on “ File Handling (reading single character)”

//Java program to read single character from the file

```
import java.io.FileInputStream;

public class DataStreamCharReadExample {

    public static void main (String args[]) {

        try{

            FileInputStream fin=new FileInputStream("D:\\testout.txt");

            int i=fin.read();

            System.out.print((char)i);

            fin.close();

        } catch (Exception e) {System.out.println(e);}

    }

}
```

EXPT 16 : Java Program on “Enum data type”

// Java Program using enum write a code to demonstrate

```
public class Main {  
    enum Level{  
        LOW,  
        MEDIUM,  
        HIGH  
    }  
    public static void main (String[] args) {  
        Level myVar = Level.MEDIUM;  
        System.out.println (myVar);  
    }  
}
```
